

POWER AND HOT WATER ALL IN ONE

NeOn Energy has changed the game in Solar with a significant advancement in Solar Technology with TWINPOWER®!

Maximising energy production from your rooftop has never been easier than with TWINPOWER®'s new hybrid system. This new technology uses your precious roof space to extend your pool season, provide domestic hot water and reduce your electricity bill to save you more money than ever before.

THE BEST SOLUTION FOR YOUR DOMESTIC HOT WATER AND YOUR POOL

What is TWINPOWER®?

TWINPOWER® combines solar thermal and electric solar power into one panel.

Is TWINPOWER® more efficient than other solar systems? Yes, TWINPOWER® can collect three or even four times the total solar energy of a solar electricity system from the same roof area. This means you generate more savings for a longer period with the same roof space.

Is TWINPOWER® tested, certified and locally code-compliant?

TWINPOWER® has been ISO tested, TUV tested, SRCC Certified, IEC Certified (which the South African Bureau of Standards accepted) and it is also Class A fire rated.
